ASTRALPOOL

BENCH FOR AUTOMATIC ABOVE-GROUND COVER

Why choose *Le BANC* by ASTRALPOOL

GUARANTEED **SAFETY**

Le BANC By AstralPool ensures optimal pool safety. Compliant with the **NF P90-308** standard depending on the safety system selected.

For a pool with a width at water level:

- **from 0 to 1.99 m:** the cover is not compliant with the NF P90-308 standard, regardless of the safety system.
- **≥ 2 m :** the cover complies with the NF P90-308 standard regardless of the safety system (ABS, fabric, or stainless steel), and is designed for wall or coping installation..

Ultra-resistant clamps, for wall or coping installation, closing off the pool in a safe way. Once fitted, access to the water is blocked*.

Once closed, the cover also protects the pool from debris such as leaves, pollen, and dust…

It also acts as a thermal barrier, reducing evaporation and heat loss.

TECHNICAL AND PRACTICAL **BENEFITS**

Le BANC By AstralPool, with its exclusive, custom-designed style, offers a range of configurations for every taste:

- **Top cladding only:** in white or “wood-grain” PVC
- **Top and side cladding:** in white or "wood-grain" PVC
- **Without cladding,** to fully customize the bench with the finishes of your choice
- **Another advantage:** if your pool is already equipped with an AstralPool above-ground frame (OCTEO / SVELTEA / COVERLY / BELLASUN, or older model), an upgrade kit offers a cladding solution that is not only quick for your pool professional to install but also cost-effective, since it uses your existing roller mechanism.
- **Peace of mind:** comes standard with an end-of-travel system. Once the closing mechanism is engaged, the cover stops automatically at the end of the pool.
- **Perfectly adapted to market developments:** for users who have opted for water treatment with a salt chlorinator, Le BANC comes standard with a box containing a dedicated contact for operating the dosing device (except for the solar version). Depending on the chlorinator settings, the chlorine dose will be dispensed automatically based on whether the automatic cover is open or closed..

MADE IN FRANCE

AESTHETIC **FRENCH MANUFACTURING**

For an outdoor space with a balanced look, AstralPool offers Le BANC, an elegant piece of furniture that is suitable for the above-ground automatic cover and its base. Designed as outdoor furniture: this equipment enhances the pool area and complements lthe landscaping of all outdoor areas. With its contemporary design, Le BANC By AstralPool **blends seamlessly into all outdoor environment styles.** Made in France, Le BANC is **custom-designed using premium materials. Customizable** to suit your tastes and preferences, Le BANC provides a lovely spot to relax by the pool.

** **Important:** a safety cover is no substitute for common sense or personal responsibility. Nor is it intended to replace the vigilance of parents or responsible adults, which remains the key factor when protecting others, especially young children.*

Mobile rail-mounted SOLAR version without cladding

A kit consisting of a solar panel integrated into the upper cladding + a charge controller + a 24V battery.

** Not available & compatible with the solar version*

LE BANC by ASTRALPOOL, COMPONENTS:

AUTOMATIC COVER **SLATS**

Water conservation

The slats are an integral component of the above-ground automatic cover. They must comply with standards, look good and offer maximum durability.

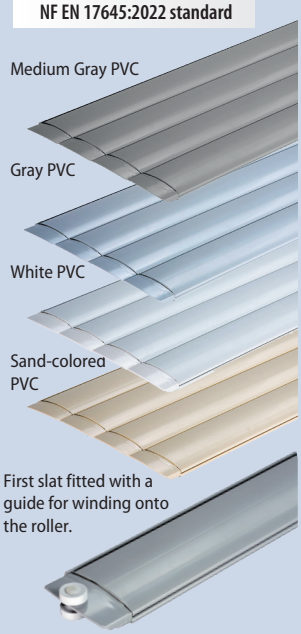

2 slat finish options, in **PVC** or **POLYCARBONATE.** Whatever your choice, they guarantee:

- compliance with the standard,
- UV and impact resistance,
- a sleek slat profile and a wide range of colors to complement the environment,
- excellent buoyancy and a 3-year warranty,
- compatibility with salt water chlorinator treatment.

PVC slats are the most popular choice, although **POLYCARBONATE** slats guarantee greater strength thanks to their design:

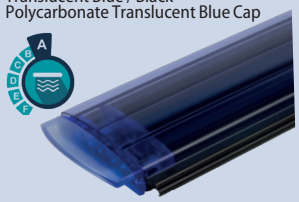

- **Impact resistance:** approximately eight times greater than PVC (45-minute hail resistance compliance test).
- **Temperature:** deformation point (VICAT) at 140° versus 80° for a PVC slat.
- **Time:** good resistance to the passing of time.

Efficiency according to the NF EN 17645:2022 standard

First slat fitted with a guide for winding onto the roller.

Translucent Blue / Black Polycarbonate Translucent Blue Cap

Metallic Gray / Black Polycarbonate Transparent Cap

Transparent / Black Polycarbonate Black Cap

The POLYCARBONATE slats help HEAT THE WATER

Energy efficiency

SAFETY SYSTEMS

For wall or coping installation

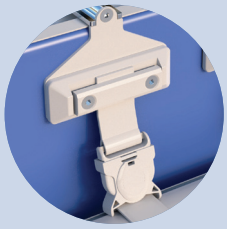

Buckle system with a fabric strap

ABS system

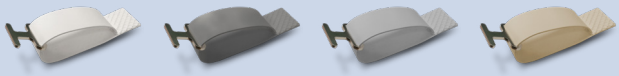

INOX system

316L stainless steel buckle + PVC strap in the same color as the slat

OPTION COVER CONNECT

COVER CONNECT combines a wireless wall-mounted control unit with a Bluetooth pairing station for a free, no-obligation mobile app.

Compliant with industry standards, it lets you open and close your pool using your smartphone or the secure control panel— **NO MORE KEYS!**

Not compatible with the solar version

Mobile app
