

VIGO PRO MAX

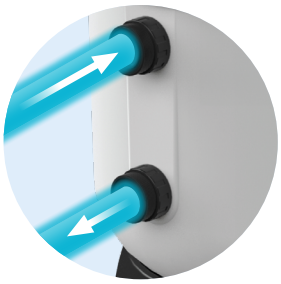

HIGH QUALITY AND EFFICIENT FILTRATION FOR PROFESSIONALS

HIGH FILTRATION QUALITY

Thanks to a filter bed increased by up to 30%, the Vigo Pro Max offers **crystal clear pool water** and improved filtration.

ENERGY EFFICIENT

The Vigo Pro Max is your optimal choice to **reduce pressure drops** and ensure energy-efficient performance. The **2" lateral ports** and 1" water collectors are the main improvements compared to standard filters. Both **the 6-way multiport valve and automatic piston valve are compatible** with these ports, which also minimize energy losses. Complete your installation with a variable speed pump to increase energy savings.

EASY MAINTENANCE

Enhanced access to the filter's interior is provided by an extra-large lid. The glycerin-filled manometer with an adjustable clogging indicator offers **precise and clear pressure readings**. Furthermore, the removable diffuser and the 2 ½" sand drain **expedite maintenance processes**.

ASTRALPOOL

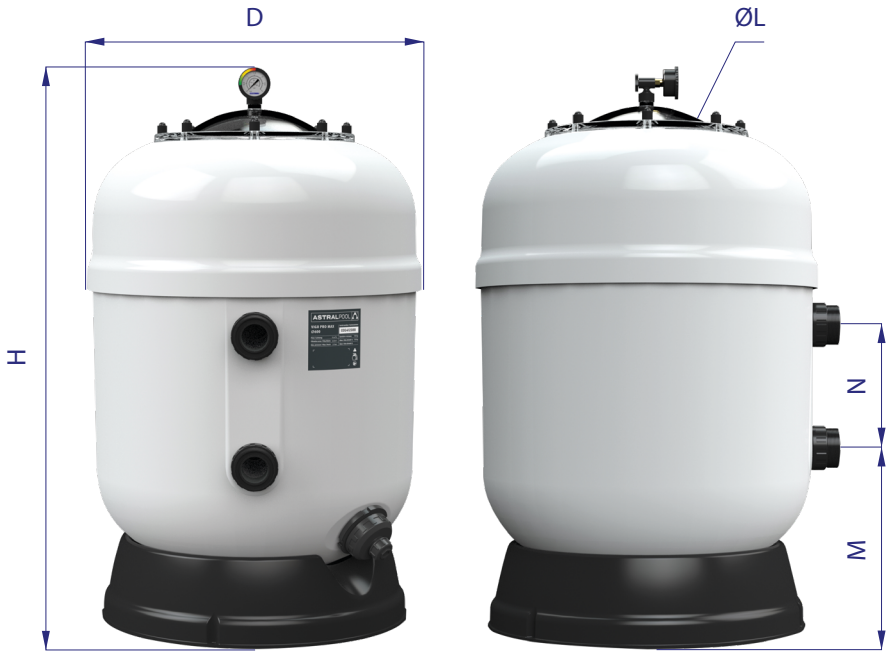

TECHNICAL FEATURES

Complies with Standard EN 16713-01

CODES		77144-0100	77145-0100	77146-0100
